About Soft Touch Bases

The patented Soft Touch® Progressive Release design allows the base to release from its anchor with just the right amount of force allowing for aggressive, yet safer play. Our polyurethane bases provide the ultimate flexibility in mounting options while minimizing the potential for player injuries. Soft Touch® baseball and softball bases with the patented progressive release design are the safer alternative to bases advertised as break-away or disengage-able. Progressive release bases meet the Little League "disengage-able" base rule implemented in 2008. All of our 14-inch bases comply with Little League Rule 1.06
